Advanced Force Gauge

See pages 5 - 8 for 'Smart' Force & Torque Sensors

The Advanced Force Gauge (AFG) is the most versatile and fully-featured digital force gauge on the market. It can be used hand-held or fixed to a manual or motorised test stand and for added flexibility the AFG is able to recognise data from a range of external 'Smart' force and torque sensors, so you can use it as a universal display for remote applications (see pages 5 to 8).

KEY FEATURES:

- 10 capacities - from 2.5N to 2500N
- Peak capture - Ultimate max + 1st peak
- Data output - RS232, digimatic and analogue
- Pass/Fail Alarms - audible and visual
- Overload warning with trend bar
- Wide range of grips and fixtures

RS232, Mitutoyo, Analogue data output for easy data transmission. A calibrated analogue output can be supplied as an option.

 RS232 to Bluetooth adaptor (optional extra)

Recognises data from a range of external force & torque transducers e.g. S-Beam, Load Button Cell and Static Torque Wrench.

View the 1st peak and ultimate peak readings
On-board memory stores up to 500 readings

Accurate to $\pm 0.1\%$ full-scale

Internal loadcell stud for quick and easy change of accessories and fixtures
Loadcell stud 10-32 UNF male (5/16 UNC male for AFG 1000N & 2500N)

Audible & visual pass/fail alarms set a threshold for immediate alert when limits are exceeded

Measurements made in N, kN, mN, lbf, ozf, kgf and gf with a sampling rate of 5000Hz

Reversible display
View readings even when the gauge is positioned away from you

Rugged metal housing ideal for factory or outdoor use

AFG Specification Table

Model	Part No.	mN	N	kN	gf	kgf	ozf	lbf
AFG 2.5	850-412	2,500 x 0.5	2.5 x 0.0005	-	250 x 0.05	-	9 x 0.002	0.55 x 0.0001

AFG 10	850-414	10,000 x 2	10 x 0.002	-	1,000 x 0.2	1 x 0.0002	35 x 0.01	2.2 x 0.0005
AFG 25	850-415	25,000 x 5	25 x 0.005	-	2,500 x 0.5	2.5 x 0.0005	90 x 0.02	5.5 x 0.001
AFG 50	850-416	50,000 x 10	50 x 0.01	-	5,000 x 1	5 x 0.001	180 x 0.05	11 x 0.002
AFG 100	850-417	-	100 x 0.02	-	10,000 x 2	10 x 0.002	350 x 0.1	22 x 0.005
AFG 250	850-418	-	250 x 0.05	-	25,000 x 5	25 x 0.005	900 x 0.2	55 x 0.01
AFG 500	850-419	-	500 x 0.1	-	50,000 x 10	50 x 0.01	1,800 x 0.5	110 x 0.02
AFG 1000	850-420	-	1,000 x 0.2	1 x 0.0002	-	100 x 0.02	3,500 x 1	220 x 0.05
AFG 2500	850-421	-	2,500 x 0.5	2.5 x 0.0005	-	250 x 0.05	9,000 x 2	550 x 0.1

- Accuracy $\pm 0.1\%$ of full scale
- Full scale deflection of loadcell typically 0.5mm

AFG shown mounted to the MultiTest-d motorised test stand

The dual level design of the keypad ensures that operation of this powerful gauge is kept simple, thereby making it ideal for use from production shop floor to R&D.

Housed in an ergonomically shaped, rugged aluminium case, the AFG is powered by either mains-adaptor or standard rechargeable AAA batteries.

All models carry CE marking and are supplied in a robust carrying case with standard accessories and a calibration certificate traceable to UK national standards.

See page 12 for details of accessories supplied.

The Advanced Force & Torque Indicator

See pages 5 - 8 for 'Smart' Force & Torque Sensors

The Advanced Force & Torque Indicator (AFTI) is a high-specification display unit with similar features and benefits of the AFG, for use with Mecmesin 'Smart' force and torque sensors. These plug into the AFTI enabling it to automatically register either force or torque readings for a variety of test applications. 'Smart' sensors may also be used with Mecmesin's Advanced Force Gauge (AFG).

FORCE

Tension, compression &
torque measurement
with full unit conversion
of displayed value

1st & ultimate peak capture

These sensors are ideal for mounting onto your own test rigs and jigs to monitor load application. They can also be used for checking calibration of your machinery to assess whether it is applying the expected load.

'Smart' Force & Torque Sensors

All sensors are fitted with 1.5m cable length, are fully interchangeable and are supplied with Calibration Certificates traceable to UK National Standards. As standard they are delivered in cardboard transit cases.

Key Features:

- Sensors for torque, tension & compression
- Calibration Certificates traceable to UK National Standards
- Resolution - 1:5000
- Overload protection feature
- 1.5m cable length as standard

force & torque
plug-in sensors
adaptable

All dimensions quoted for the force & torque sensors are for reference only. Please contact the Mecmesin Sales Department for tolerance information if your application is dimensionally critical.

Overload protection by software warning is typically 120% of full scale for all items (without accessories), with additional mechanical overload protection being up to a minimum of 150% of full scale.

All gauges and sensors are calibrated under controlled laboratory conditions at a temperature of $20^{\circ}\text{C} \pm 2^{\circ}\text{C}$. Resolution for all sensors is typically 1:5000 - e.g. a 5000N loadcell resolves to 1N.

Bluetooth/USB Adaptor

- Cableless Communication
- Range in excess of 30 metres
- Easy-to-use, just 'Plug & Play'
- Maximum flexibility for data transfer
- Connects to AFG & AFTI

Tension & Compression Sensors

For use with AFTI display or Advanced Force Gauge (AFG)

Junior S-Beam - 'Smart'

The Junior S-Beam is suitable for measuring tension and compression. Ideal for applications where available space is limited. Dedicated fixtures can be fitted via threaded holes.

For use with AFTI display or Advanced Force Gauge (AFG)

Basic Force Gauge

The Basic Force Gauge (BFG) is designed for easy operation and provides outstanding tension and compression measurement performance and reliability at an affordable price.

Constructed in a rigid yet lightweight aluminium housing, with its ergonomically attractive shape, the BFG can be used as a hand-held instrument, or alternatively it can be mounted to manual or motorised test stands to allow testing under more controlled conditions.

BFG Specification Table

Model	Part No	mN	N	kN	gf	kgf	ozf	lbf
BFG 10	853 - 410	10,000 x 2	10 x 0.002	-	1,000 x 0.2	1 x 0.0002	35 x 0.01	2.2 x 0.0005

- Accuracy $\pm 0.25\%$ of full scale
- Calibration temperature 20C ± 2 C
- Operating temperature 10C - 35C

easy-to-use
robust
ergonomic

KEY FEATURES:

- 6 capacities - from 10N up to 2500N
- Full unit conversion of displayed value
- Powered by 4 nickel metal hydride rechargeable batteries
- M5 mounting holes (57mm pitch) for test stand fixing
- Wide range of grips and fixtures

BFG shown mounted to the MDD manual test stand

All models carry CE marking and are supplied in a robust carrying case with standard accessories and a calibration certificate traceable to UK national standards.

Top-load test

BFG with accessories

Compact Force Gauge⁺

The Compact Force Gauge⁺ (CFG⁺) is a pocket-sized, lightweight force gauge designed for elementary tension and compression measurement. Powered by disposable AA batteries, the CFG⁺ is delivered with a Declaration of Conformity as standard. A Calibration Certificate is available upon request.

Peak readings captured at 500Hz with an accuracy of $\pm 0.5\%$ of full scale

low cost
peak hold
portable

Measurements made in N, lbf, ozf, kgf and gf with a resolution of 1.0000

Housed in a lightweight plastic case

Loadcell stud 10-32 UNF male

RS232 output for easy data transmission

The CFG⁺ provides a simple digital alternative to traditional analogue spring balances. It is ideal for users with a limited budget, who only measure on an occasional basis for non-critical applications.

CFG⁺ Specification Table

Model No.	Part No.	N	kgf	lbf
CFG ⁺ 50	860 - 021	50 x 0.05	5 x 0.005	11 x 0.01
CFG ⁺ 200	860 - 022	200 x 0.2	20 x 0.02	44 x 0.05
CFG ⁺ 500	860 - 023	500 x 0.5	50 x 0.05	110 x 0.1

- Accuracy $\pm 0.5\%$ of full scale

Note. The following units are available on the majority of CFG⁺ models. Those that differ are marked by an asterisk with details given below.

kN*, N, mN, kgf, gf**, lbf, ozf

* Not available on the CFG⁺ 50N

**Not available on the CFG⁺ 200N or 500N

Drawer Testing

Accessories

Each Mecmesin gauge comes with a set of standard accessories to help perform basic tension or compression tests.

A wide selection of accessories exclusive to Mecmesin are available. See our Accessory datasheets for an extensive range of grips and fixtures, to enable you to complete thousands of different tests. Alternatively make use of our experienced team of engineers to provide a customised grip to solve your particular problem.

Service & Calibration

Mecmesin ensures all customers receive a high level of on-going service and support. This includes offering a prompt and cost-effective calibration service. Though calibrations can be completed in our comprehensive in-house facility, customers also have the option of our on-site calibration service.

Additional Products

To enhance your testing capability, Mecmesin offers a number of additional products including:

Software

Emperor™ Lite

Emperor™ Lite is Mecmesin's powerful data-acquisition software, for use with its extensive range of force & torque measurement equipment. The software quickly and easily enables operators to perform in-depth analysis of measurements using a graphical trace of the test. User-selectable calculations provide instant results for key test parameters, allowing you to gain valuable quantitative information about the test samples.

Graphical representation of a peel test

- View test 'live' on PC screen
- Perform multiple calculations e.g. peak, minimum and average
- Easily identify and label critical measurement values and success/failure points during the test
- Summary test report with graphical traces

Grips

Mecmesin offers a wide range of grips and fixtures, to suit many types of application. For those with a specialised requirement, we can design and manufacture a customised fixture to match your specifications.

- Compression plates
- Test hooks
- Textile attachment grips
- Claw type grips
- Compression probes
- Wedge grips
- Flat-faced jaw grips
- Cam grips

Applications

Our range of digital gauges can be used in combination with our test stands to perform many different applications.

- Release-torque testing
- Compressive testing
- Deformation testing
- Medical Device testing

Fabric testing

Keypad testing

- Packaging testing
- Tensile testing
- Textile testing
- Top-load testing

Peel testing

Mecmesin's range of testing equipment has been successfully used in a number of different industry sectors including:

aerospace

automotive

beverage

cosmetics

doors, gates & barriers

electrical

engineering

food & drink

manual handling

medical

military

packaging

paper & board

pharmaceutical

plastics

safety

sports

textiles

Support Services

- Comprehensive network of international distributors
- 24 month warranty
- Website support
- Calibration, service & repair centre
- On-site installation and training
- Accessories
- Application support

Mecmesin

testing to perfection

Over 30 Years Experience in Force & Torque Technology

Formed in 1977, Mecmesin Limited is today widely regarded as a leader in force and torque technology for quality control testing in design and production. The Mecmesin brand stands for excellent levels of performance and reliability, guaranteeing high quality results.

Quality control managers, designers and engineers working on production lines and in research laboratories worldwide rely upon Mecmesin force & torque measurement systems for a range of quality control testing applications, which is almost limitless.
